State Policy Changes: Net Metering

Net Metering 101

Your excess electricity is fully credited at retail value when sent to distribution grid. Credits from July help cover December.

Net Metering Phase-Out Timeline

Date Installed/Interconnected	Net Metering Until:	Time Period
Before Dec 31, 2017	July 1, 2047	30 years
After Dec 31, 2017	July 1, 2032	~15 years
July 1, 2022	July 1, 2032	10 years

Who is impacted by this state policy change?

Investor Owned Utilities
(NIPSCO, I&M Power/AEP, Duke, Vectren)

Impacted.

Long-term financial benefits best if installed and interconnected before 12/31/17.

Note: If installed in 2018 or 2019, payback period likely unaffected.

Off-Grid
Systems

Not Impacted. Life as usual.

Municipal/Rural
Utilities

On-Grid Solar
with no excess to
export

Feed-In Tariff
Systems*

* Existing Feed-In Tariff systems will not be grandfathered into net metering after the 15 year contract ends

Don't Delay: Submit Interconnection Apps Before Oct 19th

STEPS

2017 Timeline

Application submitted

October 19, 2017

Notice that application is complete
- 10 business days after submission

November 2, 2017

Notice re whether facility is approved
- 15 business days after notice

November 28, 2017

Notice re inspection; agreement sent
- 10 business days after approval

December 12, 2017

Customer signs and returns agreement
- 10 business days before start date

December 14, 2017

Installation complete

December 31, 2017

Solarize Northern Indiana

1. Leverage Purchasing Block

- Upfront Discount
- Additional Rebate Based on Participation

2. Installer, Pricing, Equipment Pre-Selected Competitively

- Avoid Multiple Quotes

3. Attend a Workshop: Make it Simple to Go Solar!

- Education: Understand Local Processes
- Two Decision Points
 - o Letter of Intent
 - o Contract
